

FLOOR PUMPS FOR EVERYONE

A year has passed since the first of Truflo's new floor pumps landed on UK shores, since then the Supertrax, Classictrax and Airstore pumps have arrived, completing a range with price-points to suit a variety of budgets and a wider spectrum of customers including leisure, road, gravel and MTB cyclists. Feedback has been overwhelmingly positive and we have great stock levels, meaning you can rely on Truflo floor pumps to be a stable in your customer offering.

Each pump in the range is compatible with presta and schrader valves, therefore compatible with most bikes being sold or in use right now. But which pump is best suited to each type of customer? Read on for our comprehensive guide

QA4410
Ecotrax Floor Pump

- New entry level floor pump delivering great inflation in a compact package
- 1.5" dial gauge on pump head
- Auto-select head with thumb lock for easy use on Presta and Schrader valves
- No need to reverse any internals when switching between valves
- Suitable for all bikes
- Smaller size makes it ideal for home or travel use
- Inflates to 120 PSI
- Height 54cm

Best suited to: New cyclists and those with limited storage space. Its common to sell a saddle bag, puncture kit, mini pump and spare innertubes to new cyclists when they buy a bike – why not a great value, compact floor pump which will make the critical job of checking and topping up their tyre pressures easy?

QA4417
Classictrax Floor Pump

- The new Classictrax pump offers superb style but also top inflation performance
- Featuring high polished aluminium barrel
- Traditional wooden handle
- Die cast aluminium base with integrated 2.5" gauge
- Aluminium twin valve pump head with air bleed button
- Secure fitting even at high pressures
- Fits Presta and Schrader valves
- Suitable for all bikes
- Ideal for home, workshop or velodrome use
- Inflates to 240 PSI
- Height 67cm

Best suited to: Cyclists who take pride in their workshop. Spotless F1 style pit or oil-soaked grotto – this pump adds some class. The bleed valve and extreme pressure capability makes this pump extremely easy to use.

QA4414
Maxtrax 4 Floor Pump

- The successor to the best-selling Maxtrax 3 floor pump with improved design and upgraded features
- 2.5" Top mounted gauge for easy reading
- Durable steel barrel with steel base for stability
- Comfortable and ergonomic composite handle
- Auto-select head with thumb lock for easy use on Presta and Schrader valves
- No need to reverse any internals when switching between valves
- Ideal for home, workshop or trail use
- Easy reach hose attachment for bikes in work stands or mounted on car racks
- Suitable for all bikes
- Inflates to 160 PSI
- Height 66 cm

Best suited to: All cyclists. Similar features to the Easitrax and capable of reaching a bicycle in a work stand.

QA4406

Airstore Floor Pump

- The tubeless rider's go-to track pump is here and is built to last
- Secondary cylinder can be pre-loaded to 260psi and released in an instant via the air tap on the head
- Cylinder will hold pressure for days on end, an ideal pit weapon for tired racers
- Ultra strong steel base with rubber foot
- Ergonomic steel handle
- 6063 aluminium barrel
- Rated to 260psi/18 Bar
- Screw on clever head fits Presta and Schrader valves
- 680mm height

Best suited to: Cyclists who ride Tubeless. A essentials tool for anyone who rides tubeless. 99% of the time, correct preparation and a good quality floor pump is enough to "seat" and inflate all combinations of rim/tyre/brand/model, however every now and again a bit of extra oomph is required. The Truflo Airstore can provide that oomph releasing up to 260PSI in an instant using the air release switch on the pump head.

QA4411 - Black QA4412 - Red

QA4413 - Blue

Easitrax Floor Pump

- The successor to the best-selling Easitrax 3 with improved design and upgraded features
- 2.5" high mounted easy to read pressure gauge
- Durable steel barrel with steel base for stability
- Comfortable and ergonomic composite handle
- Auto-select head with thumb lock for easy use on Presta and Schrader valves
- No need to reverse any internals when switching between valves
- Suitable for all bikes
- Ideal for home and workshop use
- Inflates to 160 PSI
- Height 63cm

Best suited to: All cyclists. The perfect all-rounder floor pump, with a stable base, ergonomic handle and the convenience of an auto-select head.

QA4415

Supertrax Floor Pump

- The new Supertrax High Volume/High Pressure combined pump that features all the latest technology and cool design but at an affordable price
- Supertrax is a one-stop pump suitable for lower pressure gravel and MTB tyres as well as higher pressure road tyres with just a flick of the switch
- Switch between High Volume/High Pressure mode using the lever on the handle
- Base mounted 3" dual scale gauge for easy reading and displaying low and high pressure
- 0-40 PSI zone features 1 digit increments for faster and accurate inflation on wider gravel or MTB tyres and where precision is required at lower pressures
- 40-160 PSI zone suited for road tyre inflation
- Durable steel barrel with steel base for stability
- Comfortable and ergonomic composite handle
- Auto-select head with thumb lock for easy use on Presta and Schrader valves
- No need to reverse any internals when switching between valves
- Ideal for home, workshop or trail use
- Suitable for all bikes
- Inflates to 40/160 PSI
- Height 66cm

Best suited to: Cyclists who ride multiple disciplines. Reach high pressures with ease and low pressures with accuracy switching between High pressure/Volume modes. The Supertrax offers an extra level of convenience for those who ride more often/more bikes/more variety of terrain/all of the above.
